

Weddings

Your wedding day is a special day and we go to great lengths to ensure that everything goes as smoothly as possible. From the wedding breakfast, to the first dance and then the end of the evening, we will meet with you before hand to plan everything just the way you want it. We have no problem playing from a playlist or using our expertise to select music that will make the evening one to remember.

Today there is more an emphasis on bespoke packages, every wedding is different from the venue, type of music and setting up arrangements. By listening to what the bride and groom need on their special day, we will be flexible to fit in with your requirements.

We can just provide entertainment for the evening reception, background music for the breakfast and microphones for the speeches if required.

We work with the venue managers, photographer, caterers, wedding organiser and anyone else involved in the special day to make sure it all comes together just the way you want it.

Whatever the venue, a village hall, hotel, marquee or other, we always give the same attention to detail.
